

We supply trolleys for the cumbersome jumbo (big) cylinders as well as small cylinders. These hand trolleys are specially designed to hold and easily transport heavy compressed gas cylinders by persons of moderate strength. They feature arc welded tubular steel construction for strength. All models roll quietly and smoothly on large solid rubber tired wheels and castors for better maneuverability over rough or even surfaces. Trolleys are finished with scratch resistant, high gloss, electrostatically applied oven baked powder coat.

SINGLE CYLINDER TROLLEY:

- Designed to handle one jumbo cylinder of 7 cum. capacity
- Two rear castor, to provide greater stability
- The operator carries no. load
- Has greater control over the trolley
- Easily retractable rear wheel assembly
- Cylinder is held securely by a safety chain
- Optional additional accessories include braking wheels (rear wheels can be locked) and a tool box**

TWO CYLINDER TROLLEY:

- Handles two jumbo cylinders of 7 cum
- Longer handles to ease off mobility
- Dual binding chains for extra security
- Retractable rear castors
- Extra load handling safety Good load control
- Solid rubber front wheels **Optional additional accessories include braking wheels (rear wheels can be locked) and a tool box**

WALL MOUNTING BRACKETS

If you are going to remove the cylinders from the trolley & going to place it free (loose) in the lab/floor, it is highly recommended that you keep them fastened with wall mounting brackets in order to avoid fall of cylinders accidentally.

VALVE GUARDS AND CAPS

We offer Valve Guards & Caps, which are used to protect cylinder valves. A Valve guard helps in avoiding accidents since it tightens the cylinders filled with high pressure gas. These are generally used while transporting filled cylinders.

Since 1980
